## Hospice Palliative Drug List

Within the Alabama Medicaid Agency's Hospice Program, payment is made to the hospice provider for all covered services related to the treatment of the recipient's terminal illness. In an effort to assist coordination of care between a recipient's hospice provider and their pharmacy provider, the Alabama Medicaid Agency has developed a Hospice Palliative Drug List (HPDL) as guidance for drugs that **may be** associated with the patient's terminal illness. Reimbursement for disease specific drugs related to the recipient's terminal illness is included in the per diem for hospice covered services and will not be reimbursed through the Medicaid Pharmacy Program. Reimbursement for drugs not related to the recipient's terminal illness may be made to the dispensing pharmacy through the Medicaid Pharmacy Program. Retrospective audits of the hospice and pharmacy providers may be conducted to ensure appropriate billing has occurred.
