A. Definition

Adult Day Health (ADH) is a service that provides Elderly and Disabled Waiver (EDW) clients with a variety of health, social, recreational, and support activities in a supervised group setting for four or more hours per day on a regular basis.

Transportation between the individual's place of residence and the adult day health center will be provided as a component part of Adult Day Health Service. The cost of this transportation is included in the rate paid to providers of Adult Day Health Service.

Adult Day Health is not an entitlement. It is based on the needs of the adult client.

B. Objective

The objective of Adult Day Health is to provide a continuing organized program of rehabilitative, therapeutic and supportive health and social services and activities to the Elderly and Disabled Waiver clients who are functionally impaired and who, due to the severity of their functional impairment, are not capable of living in the community independently.

C. Description of Adult Day Health Service to be Provided

The unit of service will be a client day of Adult Day Health Service consisting of four (4) or more hours at the center. The four (4) hour minimum for a client day does not include transportation time. The number of units authorized per visit must be stipulated on the Plan of Care and the Service Authorization Form.

Medicaid will not reimburse for services rendered by a provider that have not been approved by Medicaid's Waiver QA Program as an ADH Provider.

Medicaid will not reimburse for activities performed which are not within the scope of service.

Adult Day Health Service is provided within a maintenance model of care, which provides services that include the following health and social activities, needed to ensure optimal functioning of the client.

2. According to the Alabama Board of Nursing medications can be administered by a Registered Nurse (RN) or Licensed Practical Nurse (LPN) who is currently licensed by the Alabama State Board of Nursing to practice nursing. The medication must be filled by a pharmacy with physician instructions written on the label. The written instructions on the container are considered a physician order. However, the nurse has an additional obligation to keep a record of all medications given to a client in the client's file. This policy is applicable, if a nurse is on staff at the facility. Medications cannot be administered by any other staff member at the ADH center. However, the other staff member can remind a client to take medication when necessary.
3. Observe and assist the client to maintain good personal hygiene on a daily basis.
4. Provide planned therapeutic activities on a daily basis to stimulate the client's mental and physical activity, communication and self-expression. These include reality orientation exercises, crafts, music, educational and cultural program, and games, etc.
